

THANKSGIVING FEAST TO GO **Reheating Instructions**

Thank you for ordering your Thanksgiving meal from us! We've worked hard to prepare your meal for you. Everything has been fully cooked (unless otherwise noted below) and just needs to be reheated. The instructions below are guidelines, and reheating times may vary depending on your oven. For food safety, please be sure to reheat all items to 165 degrees prior to service. Enjoy!

SMOKED WHOLE TURKEY

YOUR TURKEY HAS BEEN PREVIOUSLY COOKED TO A MINIMUM INTERNAL TEMPERATURE OF 165 DEGREES TO ENSURE FOOD SAFETY. BECAUSE THIS IS A SMOKED TURKEY, IT IS NORMAL FOR A PINK SMOKE RING TO HAVE FORMED DURING THE COOKING PROCESS WITHIN THE TURKEY.

To re-heat your turkey, pre-heat your conventional oven to 350 degrees. If you are using a convection oven, heat to 325 degrees. Your turkey has been packaged inside an oven safe bag to ensure it maintains its moisture during the re-heating process. Make sure the oven bag is sealed, and then place the pan with the turkey inside of the bag into your oven for 1-1:30 hours (or until breast reaches an internal temperature of 165). If you would like to crisp the skin, open the bag after 45 minutes and apply spray butter or olive oil letting it set on top of the turkey for the remaining 15-30 minutes in the oven. Once the turkey breast reaches 165 degrees, remove from the oven, let rest for 15-20 minutes, and you are ready to serve!
